# Conference Service Mandl

One of the most complete scientific conference calendars on the Web

English

français

deutsch

## Conferences and Meetings on Mining & Mineral Processing

Conference-Service.com offers, as part of our business activities, a directory of upcoming scientific and technical meetings. The calendar is published for the convenience of conference participants and we strive to support conference organisers who need to publish their upcoming events. Although great care is being taken to ensure the correctness of all entries, we cannot accept any liability that may arise from the presence, absence or incorrectness of any particular information on this website. **Always check with the meeting organizer before making arrangements to participate in an event!**

Meeting organizers can [submit meetings](#) free of charge for inclusion into the listing.

## ALL COUNTRIES

- **5th Annual China Gold & Precious Metals Summit 2010** [ID=364608]

**01 Dec 2010 → 03 Dec 2010; Shanghai, China**

**abstract:** It is China's largest networking and information exchange platform for gold & precious metals industry.

**topics:** Gold,Precious metals,Bullion

**weblink:** <http://www.chinagoldsummit.com/gold/>
- **2nd Indonesia Mining 2010 Conference** [ID=365302]

**08 Dec 2010 → 09 Dec 2010; Bali, Indonesia**

**abstract:** With some of the world's largest deposits of minerals and metals, Indonesia offers a vast range of opportunities for the discerning mining investor. The quote above reflects the uncertainty felt by investors when viewing Indonesia. Returning this 2010, the 2nd Indonesia Mining will revolved around how mining industry leaders are improving the current investment climate for coal & non-coal mining in Indonesia. Mining industry stakeholders and investors, such as you, will gain up-to-date information on how your mining operations are being impacted by government initiatives to reduce uncertainty, and the best strategies to succeed in this highly prospective mining market.

**topics:** Mining market, Mining strategies, indonesia mining conference, 8 December 2010, 9 December 2010, ABF, Asia Business Forum

**weblink:** <http://www.abf-asia.com/page/public/contents/event/im2010/conference/293>
- **CERCAMS-14 Workshop ?Ore Giants of Asia?** [ID=365818]

**05 Jan 2011 → 07 Jan 2011; London, United Kingdom**

**weblink:** <http://www.nhm.ac.uk/research-curation/research/projects/cercams/index.html>  
**related subject(s):** Geophysics and Geology

- 
4. **AMC 2011 — Asia Mining Congress 2011** [ID=354666]
- 04 Apr 2011 → 08 Apr 2011; Marina Bay Sands, Singapore**
- abstract:** Asia Mining Congress is the region's definitive leadership forum for exploration, investment and development. It is an invaluable channel for the global metals & mining industry to cultivate long-term partnerships with the region's mining stakeholders and investors. The Asia Mining Congress is where the world's major mining companies and the region's most influential investors will be convening as a platform to discover new investment opportunities.
- topics:** Mining, Investments, Capital Raising, Metals, Exploration, Regulators, Project Financiers
- weblink:** <http://www.terrapinn.com/2011/asiamining/index.stm>
- 
5. **Asia Mining Congress 2011** [ID=359486]
- 04 Apr 2011 → 08 Apr 2011; Singapore, Singapore**
- abstract:** Asia Mining Congress is the region's definitive leadership forum for exploration, investment and development. It is an invaluable channel for the global metals and mining industry to cultivate long-term partnerships with the region's mining stakeholders and investors. This event is a platform whereby the world's major mining companies and the region's most influential investors convene to discover new investment opportunities.
- topics:** metal, mining, investment, investor, regulator, miners, exploration, junior, capital, metals, metal traders, steel, iron ore, copper, precious metal, legal, asset management, mining projects, private equity, sovereign wealth fund
- weblink:** <http://www.terrapinn.com/2011/asiamining>
- 
6. **LIMEP 2011 — 1st Liberian Mining, Energy & Petroleum Conference & Exhibition** [ID=369795]
- 11 Apr 2011 → 13 Apr 2011; Monrovia, Liberia**
- abstract:** LIMEP 2011 is a turnkey event focusing on Liberia's mining, energy and petroleum potential and their sustainable development. LIMEP will feature three days of conference sessions, a trade exhibition, round table discussions, seminars as well as touristic trips and mine site visits. The inaugural LIMEP will gather international investors, industry experts, Liberian decision makers, development partners and donors, as well as other key actors and partners in Liberia's extractive industries. The main theme of LIMEP 2011 is "Equitable and optimal exploitation of Liberia's natural resources to underpin broad-based sustainable growth and socio-economic development"
- topics:** mining, petroleum, energy, liberia, africa, investment, finance, infrastructure, small scale mining, iron ore, gold, bauxite, petroleum, oil, gas, coal, renewable energy
- weblink:** <http://limep.com>
- related subject(s):** Petrochemistry
- 
7. **SRCR '11 — Sustainability through Resource Conservation and Recycling '11** [ID=309029]
- 09 May 2011 → 10 May 2011; Falmouth, United Kingdom**

**abstract:** This, the 2nd International Symposium on Sustainability through Resource Conservation and Recycling '11 (SRCR '11), is organised by Minerals Engineering International in consultation with Prof Markus Reuter. This conference discusses all aspects of material and metal usage.

**topics:** conservation, recycling, minerals, mining, processing, engineering, metallurgy, extractive

**weblink:** <http://www.min-eng.com/srcr11/>

**related subject(s):** Metallurgy

---

8. **CCMI '11 — Climate Change and the Minerals Industry '11** [ID=308962]

---

11 May 2011 → 12 May 2011; Falmouth, United Kingdom

**abstract:** We currently face a public debate on climate change. On one side stand those who oppose the mere notion of man-induced climate change. On the other there is a strong faction that, in its extreme, prophesises a near-future 'doomsday'. In the middle stands a community that would like to see a sound discussion and actual proofs going beyond unproven climate modelling.

It would be naive to think that modern industrialised societies play no part in climate change. The minerals industry is one of the largest producers of carbon dioxide, and the need to reduce emissions, coupled with the global recession, is having a huge economic impact.

Until it is proven whether climate change is human-induced or not, legislation and common-sense demand that carbon emissions be reduced, particularly from high CO<sub>2</sub> producers such as the minerals industry.

**topics:** climate, climate change, minerals, processing, mining, metallurgy, extractive, engineering, industry

**weblink:** <http://www.min-eng.com/climatechange11/index.html>

**related subject(s):** Metallurgy; Meteorology and Climate Change

---

9. **IMCET 2011 — 22nd International Mining Congress of Turkey** [ID=358207]

---

11 May 2011 → 13 May 2011; Ankara, Turkey

**abstract:** The objective of the 22nd International Mining Congress of Turkey organized biennially by the Chamber of Mining Engineers is to bring together mining professionals and to provide an international platform to discuss and exchange new developments and applications in their associated fields.

The languages of the congress are Turkish and English. Simultaneous translation will also be provided.

**weblink:** <http://imcet.org.tr/>

---

10. **Risk '11 — Risk-Based Approaches to Major Decisions** [ID=308994]

---

13 May 2011 → 14 May 2011; Falmouth, United Kingdom

**abstract:** This, the 1st International Symposium on Risk-Based Approaches to Major Decisions (Risk '11), is organised by Minerals Engineering International in association with RMRI.

Risk management is a vital decision-making tool in modern industry and commerce. Since virtually every decision involves some element of uncertainty, and because there are risks inherent in most of the key issues facing companies today, the ability to understand risks and manage them effectively is an important ingredient for success. This is particularly true when assessing complex and large scale decisions where considerable capital is involved.

In such cases, risk-based approaches have been shown to be highly effective because they enable decision makers to make informed management choices based on structured information and analysis and to demonstrate the basis of their decisions.

This conference will look at areas in the construction, management and operation of large scale assets where adopting a risk-based approach to decision-making offers advantages in terms of both reduced risks and commercial benefit. Novel areas of application will be discussed and innovative techniques that are demonstrably cost effective will be introduced.

**topics:** minerals, processing, engineering, mining, extractive, metallurgy, risk

**weblink:** <http://www.min-eng.com/risk11/index.html>

**related subject(s):** Metallurgy

---

11. **International Conference on Remediation of Uranium Mining and Processing Sites - Sustainability and Long Term Aspects WISSYM 2011** [ID=378228]

---

**25 May 2011 → 27 May 2011; Ronneburg, Germany**

**topics:** Mile stones of the Wismut Environmental Rehabilitation Programme and extent to which the remediation goals have been met; Site analysis and operational background; Innovative remedial technologies; Long term tasks and follow-up care of reclaimed mine areas; Water management and water treatment; Monitoring and data management; Area management and reuse of reclaimed mine land; Ecology and nature preservation; International transfer of know how; Selected international case studies; Socio-economic aspects; Importance for training and education of junior professionals.

**weblink:** <http://www.wismut.de/aktuell/termine.php>

**contact:** Wismut GmbH, Jagdschänstrasse 29, 09117 Chemnitz, Germany; phone: (+49 (0) 3 71 8120-108)

**related subject(s):** Nuclear Energy and Radwaste

---

12. **ALTA 2011 Uranium** [ID=366724]

---

**26 May 2011 → 27 May 2011; Perth, Australia**

**topics:** Uranium ore treatment processes; Operational reviews & issues; New technology developments, applications & experience; Ore upgrading technology; Plant design New project reviews; Testwork, scale-up & process developmen; Leaching processes & Solid/Liquid separation; SX/IX/CIX/RIP/RIL & Precipitation processes; Equipment design & reagent developmen; Tailings, environmental & safety issues; SX Plant Fire Protection; Materials of construction and corrosion; Uranium Leaching Processes Forum.

**weblink:** [http://www.altamet.com.au/next\\_conference.htm](http://www.altamet.com.au/next_conference.htm)

**contact:** phone: (+61 3 5472 4688)

**related subject(s):** Nuclear Energy and Radwaste

---

13. **GIA Symposium 2011: Advances in Gemological Research** [ID=363382]

---

**29 May 2011 → 30 May 2011; Carlsbad, California, United States**

**abstract:** Parallel sessions of the 2011 GIA International Gemological Symposium will explore gemological research and business topics. The program will feature invited keynote

lectures, submitted oral and poster presentations, and panel discussions. Other activities include field trips to local working gem mines, workshops, and tours.

**topics:** gemology, gemological, gems, jewelry

**weblink:** <http://symposium2011.gia.edu>

**related subject(s):** Applied Physics: X-rays, Synchrotron Radiation and Crystallography

---

14. **SGEM 2011 — 11th International Multidisciplinary Scientific GeoConference and Expo** [ID=377776]

---

**19 Jun 2011 → 25 Jun 2011; Albena, Bulgaria**

**abstract:** The SGEM2011 Conference will bring together researchers, educators, and practitioners representing research and educational institutions, companies, government agencies and consulting organizations from all over the world to exchange of ideas, to define the research priorities in the above fields and to propose potential solutions of problems related to the global changes. Workshops will be held as a parallel to the conference sessions. This is an additional opportunity for SGEM participants to exchange views and to learn about best practice in environmental researches application and management.

**topics:** geology, mining, oil and gas, geophysics, geodesy, photogrametry, remotesensing, GIS, informatics, geoinformatics, micro and nanotechnologies, water resources, air and climate, ecosystems, soils, renewable energy, environmental protection, environmental economics

**weblink:** <http://www.sgem.org>

**related subject(s):** Geophysics and Geology

---

15. **Computational Modelling '11** [ID=327005]

---

**21 Jun 2011 → 22 Jun 2011; Falmouth, United Kingdom**

**abstract:** This conference aims to bring together researchers, mill operators and software developers to present and discuss the application of computational modelling to the mineral and metallurgical process industries.

**topics:** minerals, engineering, mining, extractive, metallurgy, modelling, DEM, FEM, CFD

**weblink:** <http://www.min-eng.com/modelling11/>

**related subject(s):** Metallurgy

---

16. **Physical Separation '11** [ID=327015]

---

**23 Jun 2011 → 24 Jun 2011; Falmouth, United Kingdom**

**abstract:** Although there is much current emphasis on the chemical methods of mineral separation – flotation, hydrometallurgy, and bioleaching, the physical separation methods are ubiquitous, and there is no mining operation in the world which does not make use of the density differences between solids and liquids.

**topics:** minerals, mining, extractive, metallurgy, engineering, gravity concentration, hydrocyclones, solid-liquid separation, magnetic separation, microwave technology

**weblink:** <http://www.min-eng.com/physicalseparation11/>

**related subject(s):** Metallurgy

---

17. **AIMEX** [ID=219606]

---

**06 Sep 2011 → 09 Sep 2011; Sydney, New South Wales, Australia**

**abstract:** Mining equipment, supplies and services, computers - software and hardware, conveyors and associated handling equipment, electrical equipment, fire fighting equipment, safety equipment, underground mining, transportation, environmental and dust control, opencut mining, mineral extraction, mineral processing and coal preparation, crushing, grinding and screening equipment, power generation and transmission, cabling, energy systems, process control, pumps and valves

**weblink:** <http://www.aimex.reedexhibitions.com.au/>

**18. International Conference 2011: Uranium Mining and Hydrogeology VI** [ID=378539]

**18 Sep 2011 → 22 Sep 2011; Freiberg, Germany**

**weblink:** <http://www.geo.tu-freiberg.de/umh/>

**contact:** c/o TU Bergakademie Freiberg Institute for Geology, Chair Hydrogeology Gustav-Zeuner-Str.12, 09599 Freiberg, Germany; phone: (+49 3731 39 2039)

**related subject(s):** Nuclear Energy and Radwaste

**19. Flotation '11** [ID=327003]

**14 Nov 2011 → 17 Nov 2011; Cape Town, South Africa**

**abstract:** Flotation '11 features 2 discrete symposia:

November 14-15: Flotation Fundamentals: Physics and Chemistry

Although now over a hundred years old, the fundamental aspects of flotation are still being intensively researched, and new machines developed. This two day symposium will focus on:

- Fundamental reagent and flotation chemistry
- Bubbles, froths, bubble-particle interactions
- Flotation cell hydrodynamics, kinetics and scale-up

November 16-17: Flotation Applications and Plant Practice

This two day symposium focuses on the application of flotation, and will include sessions on:

- Plant Operations, particularly related to new technology, and process mineralogy problems
- Flotation Circuits, and their modelling, simulation, control and optimisation
- Flotation machine developments
- Metallic, non-metallic and coal flotation
- Environmental considerations

**topics:** minerals, mining, extractive, metallurgy, processing, engineering, flotation

**weblink:** <http://www.min-eng.com/flotation11/>

**related subject(s):** Metallurgy

**20. Comminution '12** [ID=356072]

**17 Apr 2012 → 20 Apr 2012; Cape Town, South Africa**

**abstract:** This, the 8th International Comminution Symposium (Comminution '12) is organised by MEI in consultation with Prof Malcolm Powell and Dr. Aubrey Mainza. It is sponsored by Starkey & Associates, Industrial Minerals & The Gold & Minerals Gazette.

**topics:** minerals, engineering, extractive, metallurgy, mining, comminution, crushing, grinding, processing

**weblink:** <http://www.min-eng.com/comminution12/index.html>

**related subject(s):** [Metallurgy](#)

---

21. **PIMC '12 — Processing of Industrial Minerals & Coal '12**

[ID=356104]

**05 Jun 2012 → 06 Jun 2012; Istanbul, Turkey**

**abstract:** Although there are many operations worldwide, treating a wide range of industrial minerals, processing problems are often similar. The aim of this conference is therefore to bring together operators and scientists from apparently disparate fields, ranging from cement to potash processing and coal preparation, to discuss common problems encountered in comminution, classification, flotation, physical separation, dewatering and other areas.

**topics:** minerals, engineering, mining, extractive, metallurgy, processing, industrial, coal

**weblink:** <http://www.min-eng.com/pimc12/index.html>

**related subject(s):** [Metallurgy](#)
